

FRANCK MULLER

GENEVE

CROCO COLLECTION

For all the Croco enthusiasts, the entire Croco collection is available in: gold, black and stainless steel with the Iron Croco.

The continuity of the Croco collection pattern on the dial, case and strap is unique and iconic. It creates a disconcerting uniformity that matches perfectly the clean and soft lines of the Cintrée Curvex shape.

The self-winding platinum-rotor mechanical movement optimizes rewinding and performance in all circumstances.

With the Croco collection, Franck Muller smashes one more time the conventions and affirms his forward-thinking vision of the true art of watchmaking.

GOLD CROCO

Elegant, sporty and innovative, the Gold Croco, Iron Croco and Black Croco are harmonious timepieces. The case and even the dial seem to be an extension of the alligator strap, thus creating a disconcerting uniformity. The Gold Croco is made of a solid mass of 18k rose gold, the Iron Croco is made of stainless steel, and the Black Croco features a black PVD treatment on a white gold or stainless steel case.

Reference 8880 SC GOLD CRO

Case Manufactured case with scales aspect
18K rose gold
Width: 39.60 mm x Length: 55.40 mm x Height: 11.90 mm
