

FRANCK MULLER

GENEVE

DOUBLE RETROGRADE HOUR

Housed in the famous Cintrée Curvex™ case, the Double Retrograde Hour collection offers an unexpected display: Night and Day, in fact, are separated.

A retrograde sector placed in the upper part of the dial indicates the day hours between 6 am and 6 pm, a second one located in the lower part shows the night hours.

Once again Franck Muller presents an amazing collection able to marry sophisticated mechanical device to enjoyable conception of time.

DOUBLE RETROGRADE HOUR

Double Retrograde Hour is a dynamic and lively model, thanks to its purely marvelous hands. The minutes take the usual place of hours, and night and daytime hours are separated into two semicircles, black and white respectively.
