

FRANCK MULLER

GENEVE

MASTER CALENDAR

The Master Calendar, a magnificently clear and attractive interpretation, symbolises a new trend for Franck Muller's full calendar complication.

This collection, which is the product of lengthy research on a new interpretation of temporal data, perfectly symbolises the Franck Muller style, which features both old watchmaking design references and more avant-garde precision techniques.

The spirit of this Master Calendar collection tends towards a trend that is faithful to the Franck Muller style, i.e. seeking the very essence of the product at its absolute purest in order to restore a perfect balance between the case and its dial.
