### MASTER DATE™

A model reserved for complications enthusiasts has been added to the Cintrée Curvex™ collection. The automatic movement of Master Date, a true work of technical prowess, offers new functions in addition to the central hour and minutes hands.

A flyback day-of-the-week display in a central sector and a date in a window of generous proportions placed at 12 o'clock, offer an easy readability and a sophisticated design.

The hand moves from Monday to Sunday, advancing by one position each day and then immediately returning in its initial position at the end of the cycle.

A small second hand as well as a circular month indicator located at 6 o'clock.

The Master Date is a true example of vibrant and sophisticated design that have timeless elegance.

### MASTER DATE™

Franck Muller presents the Master Date™ collection, a phenomenal union between complication and restraint. The timepiece offers a new date interpretation with the help of the 'Master Date' model. The Master Date, displays hours, minutes, a large date, the days of the week and small seconds, the latter two at 6 o'clock, in a harmonious and balanced way. This line will find its place on the wrists of men and women whose values tend towards restraint and just a hint of originality.
