

FRANCK MULLER

GENEVE

VANGUARD™ CAMOUFLAGE

The Camouflage collection has been specially designed by Franck Muller to provide its owner a discreet yet distinctive look while he or she is exploring the desert, the forest or the seabed.

The dial adorned with the military camouflage pattern accentuates the overall impression of continuity between the case, the dial and the strap, creating thus a perfect and harmonious timepiece. The owner can choose between the green and the beige depending on the camouflage environment.

The original design of the Vanguard Camouflage is enriched by technical characteristics. Indeed, the collection is available in 3 variants: regular, chronograph and tourbillon. Housing an automatic or a manual movement, the Camouflage collection offers a power reserve up to 60 hours.

Combining technical attributes and smart design, the Camouflage collection is the perfect timepiece for the new modern adventurer.

A tone on tone nylon and rubber strap set the perfect finishing touch of the Camouflage watch.
