

FRANCK MULLER

GENEVE

VANGUARD™ S6 YACHTING

Inspired by the dynamic Vanguard™ collection, the Vanguard S6 Yachting™ develops a new creative vision of time with affirmed nautical details. The Vanguard S6 Yachting™ features all the seafaring details from the deep blue to the wind rose adorning the dial, the sea world inspired each delicate detail of this newly born timepiece.

The distinct Vanguard S6 Yachting™ perfectly complements the audacious design of the dial and enhances its high legibility. This journey partner is available in 18 carats rose gold, stainless steel and bronze to specially remind the sea world universe.

With the Vanguard S6 Yachting™, Franck Muller created the perfect alchemy between the traditional mechanical movement and the watchmaking performance of the seven days power reserve.

This timepiece is the ideal sporty watch for the owners of a yacht as the two universes share the same elegance and technical features. Details were carefully undertaken as the bridges were inspired by anchors to offer a unique design. The second at 6 o'clock was also created in the same structure as the rose wind.

The innovative structure of the Vanguard S6 Yachting™ is skeletonized, the openwork dial reveals in the truest way the components of the movement, wholly designed and manufactured in-house. The balanced design of the Vanguard S6 Yachting™ showcases the passion for crafts and the art of Franck Muller watchmakers, continually chasing the outstanding achievement.
